Exerpeutic recumbent bike

Buying a new bike is oftentimes an expensive purchase. A used bike is a good alternative because it costs less than newer models. Used means it’s had some wear and tear, so be wary. Follow this checklist of what to look for in a used bike before you buy.Where to BuyWhere do you buy a used bike? Websites like eBay and Craigslist are sources for used bikes. Check classified ads, Facebook marketplace sites, consignment stores and yard sales. Online bike sites offer guides to models and pricing, so you can know what to expect and how to bargain with the price. Read ads and browse sporting goods stores to find what newer prices are to ensure you don’t get overcharged on a used bike.FrameInspect the frame of the bike. Small scratches and chips only affect the bike aesthetically, and you can always touch them up. Rusty frames and paint bubbles indicate corrosion and should be avoided. Look for cracks in bends in the tubes. Cracks can form under the bottom bracket so be sure to examine the frame joints. The frame should also fit your size. Sit on it and make sure it fits right and feels comfortable.Wheels and TiresWhen shopping for secondhand bikes for sale, check the wheels and tires. Lift the bike at each end to spin the tires. Look for any wobbling that could indicate a warped wheel. While these can be replaced later, it will be an additional cost and something you should consider. Squeeze the spokes together to make sure there is tight tension. Test the brakes to make sure they aren’t worn out.Type of BikeConsider how you’ll be riding the bike. Do you ride on the road or trails? Trail bikes are built for rugged rides on rough terrain, so they have wider tires and shock absorbers. Road bikes are lighter in design and usually have thinner tires. A racing bike is very light and streamlined. Look for hybrids if you’ll be riding your bike on different surfaces.Drivetrain and Test-DrivesExamine the drivetrain by testing the chain. If it pulls a little slack away from the chainring, it’s probably okay. If there’s a big gap, it could indicate that the drivetrain is worn out. Finally, take the bike for a test-drive to see how it handles on flat roads and hilly areas. If it rides good and feels right, it might be the right choice. MORE FROM QUESTIONSANSWERED.NET Photo Courtesy: Pexels Hybrid bikes are often called “cross bikes” because they combine the characteristics of mountain, road, and touring bikes. They’re ideal for gravel and dirt paths or paved roads and feature a number of gears to make climbing hills easier. Wheel size, gears, suspension, and brake type are four major factors to keep in mind when you’re choosing a hybrid bike. Frame and handlebar shape are additional considerations that can impact comfort and durability. To help narrow down your choices, we’ve compiled the 10 best hybrid bikes. Poprzednie Następne © 1995-2014, Amazon.com, Inc. or its affiliates Last Updated on September 25, 2021 by JP Overview: The Exerpeutic 900XL Recumbent Bike is a sturdy and popular bike in the budget recumbent exercise bike range. A low-cost and basic setup, it doesn’t have a ton of bells and whistles besides the heart rate monitoring in the handgrips. But what the Exerpeutic 900XL Recumbent Bike does have is a durable and user-friendly design that allows you to step through the machine to get on and off, a 300 lb weight limit to accommodate bigger users, and even though it only weighs in at 63 lbs, this machine has a low center of gravity and extended leg stabilizers to keep it in place during your most intense workouts. It also has a nice oversized padded seat and large pedals to accommodate a wide range of users. Heart Rate Sensor Hand grip style heart rate sensors are a handy way to check how your cardio workout is going. The fact that a budget recumbent bike has this feature is unusual and a big plus. Comfort & Design The Exerpeutic 900XL Extended Capacity Recumbent Bike has a thoughtful design to make you want to use this bike as much as possible. It has a nice step through design so that you can get on and off the machine easily. Its low center of gravity and extended leg stabilizers to keep the bike in place during your most intense workouts. It also has a comfortable oversized seat and back rest. Extended leg stabilizers to prevent movement Large pedal design with straps prevent foot slippage Transport wheels for easy mobility Maximum User Weight: 300 lbs Exerpeutic 900XL Computer Features: LCD display Scan feature to scroll through workout data Workout data includes: Distance Calories Burned Time Speed Heart Rate Warranty: Three (3) year warranty on frame. 90-day warranty on parts Shipping and Assembly: Shipping cost for the Exerpeutic 900XL Extended Capacity Recumbent Bike with Pulse will vary in price depending on where you purchase from and what type of delivery you prefer. However, if you purchase through Amazon.com, shipping is free for this machine. The Exerpeutic 9000XL comes with a step-by-step assembly manual. Assembling this bike seems to be hit and miss. Some users claim it was very straight forward, other say it was challenging. We think that on average, it should take around an hour and a half to get the recumbent bike together. Know Your Manufacturer: Exerpeutic sits under the Paradigm Health & Wellness umbrella of brands. Based in Southern California, Paradigm Health & Wellness is a respected manufacturer of fitness products. They make a plethora of exercise equipment including treadmills, exercise bikes, recumbent machines, elliptical, inversion tables and playground equipment under various brands including Progear Fitness, Fitness Reality, Ironkids™, Ironman® Fitness, Exerpeutic Therapeutic Fitness, Workout™, and MyCloudFitness. What We Love About the Exerpeutic 900XL Extended Capacity Recumbent Bike: The Exerpeutic 900XL Extended Capacity Recumbent Bike is a nice bike for this price range. It is however as very basic model as are most bikes under \$200. This recumbent bike has a nice design to accommodate a wide range of users. Heart Rate Sensor Hand grip style heart rate sensors are a handy way to check how your cardio workout is going. The fact that a budget recumbent bike has this feature is unusual and a big plus. Comfort & Design The Exerpeutic 900XL Extended Capacity Recumbent Bike has a thoughtful design to make you want to use this bike as much as possible. It has a nice step through design so that you can get on and off the machine easily. Its low center of gravity and extended leg stabilizers to keep the bike in place during your most intense workouts. It also has a comfortable oversized seat and back rest. Finally, the 900XL Extended Capacity Recumbent Bike is equipped with large foot pedals to accommodate a wide range of users. This bike is designed very well. What Isn’t So Great: Again, this is a very low-cost recumbent that isn’t going to have all the fancy features of a higher priced bike. On the bright side, lately it seems that Exerpeutic has addressed some earlier quality concerns with the 900XL. Previously, some users reported issues while others with squeaky parts, but there have been few complaints recently. Our recommendation would be to make your purchase from a reputable dealer or Amazon.com, just in case you run into issues yourself. Resistance The Exerpeutic 900XL Extended Capacity Recumbent Bike only has eight (8) levels of resistance. This makes it challenging to tailor a resistance to your individual fitness level. Another down side of the resistance on this recumbent bike is that they must be manually set, but this is pretty common in this price range. As is no pre-programmed workouts. Final Word on the Exerpeutic 900XL Recumbent Bike: The Exerpeutic 900XL Extended Capacity Recumbent Bike comes in at a budget price and as they say, you’re getting what you pay for. But that does not necessarily mean low quality. It’s a very standard while very effective fitness machine. Its big brother, the Exerpeutic 1000 High Capacity Magnetic Recumbent Bike is also worth a look and isn’t a whole lot more expensive. Here’s a video overview of the Exerpeutic 900XL.
